-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3722

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-5 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gronbach et al (6,682,278) in view of German 29801236. Gronbach et al shows a bed 3, a column 22 movable laterally across the bed, and a pivoting spindle 24 extendible by the three legs 50-52. Note also pipe 43 and the various universal bearings for supporting these members. Figure 2 shows two laterally spaced worktables 2a, 2b, to permit one workpiece to be machined while the other is being loaded and an inclined surface 7 which diverts chips into a collection area. Gronbach et al lacks a pivoting work carrier. Figure 1 of German '236 shows a worktable 18 which is located in a horizontal position for easy loading and a piston 25 for pivoting the worktable to a vertical working position. In this manner, the chips fall into a collection chamber 6, which makes their disposal much easier. It is considered to have been obvious to have provided the tables 2a, 2b, or Gronbach et al as pivoting worktables as shown by German '236 in order to more easily remove the chips which are formed.

3. Claims 6-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Any inquiry concerning the content of this communication from the examiner should be directed to Daniel Howell, whose telephone number is 571-272-4478. The examiner's office hours are typically about 10 am until 6:30 pm, Monday through Friday. The examiner's supervisor, Boyer Ashley, may be reached at 571-272-4502.
